

# Migration Designs

```
graph TD; A[Migration Designs] --> B[Offline migration]; A --> C[Cold migration]; B --> D[Ram disk live migration]; C --> E[Memory live migration]; D --> F[Evaluation]; E --> F;
```

The diagram is a flowchart titled "Migration Designs". It starts with a central box at the top labeled "Migration Designs". From this box, two arrows point downwards to two separate boxes: "Offline migration" on the left and "Cold migration" on the right. From "Offline migration", an arrow points down to a dashed box labeled "Ram disk live migration". From "Cold migration", an arrow points down to a dashed box labeled "Memory live migration". Both of these dashed boxes have arrows pointing down to a final box at the bottom labeled "Evaluation".

Offline migration

Cold migration

Ram disk live migration

Memory live migration

Evaluation
